SUMMARY

With over 15 years of experience in software development, I have expertise in agile methodologies and proficiency in leading version control tools and frameworks. I am well-versed in cloud computing, as well as both relational and non-relational databases, and I have experience working across various operating systems. In summary, I am a skilled and adaptable developer committed to delivering high-quality results with a strong sense of responsibility and dedication.

WORK EXPERIENCE

Senior Backend Developer   Jul 2025 - Present
Cognizant
Key Responsabilities:
- *Application Development*: Design and build backend applications in Java.
- *Performance Optimization*: Improve code efficiency and scalability.
- *Service Integration*: Implement and manage integrations with APIs and microservices.
- *Testing and Debugging*: Conduct unit tests and troubleshoot code issues.
- *Team Collaboration*: Work with multidisciplinary teams to achieve project goals.
